

The DATA Group Income Fund

2005
Q3

Quarterly Report
Quarter 3 - Ended September 30, 2005

Our Values

T

The DATA Group of Companies has evolved a deeply rooted, widely recognized way of doing business. Our success owes much to a set of corporate values, which have helped to define our culture.

Solutions
BEYOND
PRINT

W

We are committed to customer service and quality.

W

We do what we say we will do.

W

We conduct our business ethically and legally.

W

We are a people-oriented company committed to safety and the environment.

W

We will develop, adapt, and use technology for our customers' benefit.

W

We strive for market leadership and take pride in our products and services.

W

We encourage decision-making and initiative at all levels of our Company.

Letter to Unitholders

I am pleased to provide our unitholders with our Third Quarter report on the results of our operations and related distributions.

The DATA Group's objective is to provide unitholders with steady, dependable and growing distributions. In our third quarter (July 1, 2005 to September 30, 2005) as a public company, the Fund had revenue of \$52.4 million, an increase of 4.7% compared with the same period in 2004. Our year to date revenue of \$159.0 million (January 1, 2005 to September 30, 2005) is up 2.0% from the same period year ago.

Adjusted EBITDA (earnings before interest, taxes, depreciation and amortization) in the quarter was \$5.7 million or 10.9% of revenue compared to \$5.5 million or 10.9% of revenue in the same period of 2004 (before the impact of foreign exchange losses on advances to the former parent). Year to date Adjusted EBITDA was \$18.6 million or 11.7% of revenue compared to \$18.7 million or 12.0% of revenue in 2004. Year to date results compare favourably to the prior year because we have incurred public company costs of \$0.3 million in the third quarter and \$1.0 million year to date.

Overall, our performance during the third quarter was strong with significant increases in revenue, gross profit and Adjusted EBITDA versus same quarter year ago. These results reflect our team's continued focus on our key strategic initiatives and the implementation of new business agreements secured earlier in the year in the health care, gaming, financial services and transportation sectors.

In closing, I would like to extend to you, our valued unitholders, our appreciation for your faith in us. In addition, we are most thankful for the continuing support of our customers and the pride and dedication our employees bring to ensuring that we are "best in class".

November 2005
The DATA Group Income Fund

David M. Odell
President and Chief Executive Officer

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL RESULTS

The DATA Group Income Fund (the "Fund") commenced business operations on December 21, 2004, when it completed an initial public offering ("IPO") and purchased all of the outstanding common shares of Data Business Forms Limited ("the Company", "DATA Group" or "Company") from WFIH, Inc. The Company is a wholly owned subsidiary of the Fund.

The DATA Group is a leading provider of total document management solutions, including printed products, and operates as three divisions. DATA East and West (which provides approximately 75% of total revenue) sells a broad range of printed products and document management services directly to end users. Sundog (which provides approximately 13% of total revenue) is a commercial printer specializing in the production of high-quality annual reports, marketing materials and event tickets. Multiple•Pakfold (which provides approximately 12% of revenue) sells forms and labels to independent brokers and resellers.

Pursuant to an Order dated March 31, 2005 issued by the Canadian Securities Administrators, The DATA Group Income Fund is required to include in its year to date results ended September 30, 2005 the results of operations for the period from December 21, 2004 to September 30, 2005.

In order to assist the reader in understanding management's discussion and analysis of the results of operations, the Fund has presented supplementary financial information for the period from December 21, 2004 to December 31, 2004, financial information for the period from January 1, 2005 to September 30, 2005, and financial information for the period from January 1, 2004 to September 30, 2004. Revenues, cost of revenues, gross margins, selling, general and administrative expenses and earnings before interest, taxes, depreciation and amortization adjusted for inventory fair value allocation charges (Adjusted EBITDA¹) have also been provided for the comparative periods ended September 30, 2004, as the Fund believes that this is the relevant information that is comparable as a result of the change in capital structure of the business following the acquisition of the Company by the Fund.

All financial information is presented in Canadian dollars, unless specified otherwise. The 2004 comparative quarterly information presented herein includes the historical financial information of the underlying business operations prior to the acquisition of the Company by the Fund. Accordingly, cost of revenues, depreciation and amortization, interest expense, pension expense and the provision

for income taxes will not be directly comparable as these income statement items are most affected by the change in the capital structure and the application of purchase accounting by the Fund.

Additional information relating to the Fund, including the audited balance sheet as at December 31, 2004, the Annual Information Form for 2004, the first and second quarter management's discussion and analysis for the periods ended March 31, 2005 and June 30, 2005, and the third quarter financial statements for the period ended September 30, 2005, is available on the System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com.

Forward-Looking Statements

Certain statements in this management's discussion and analysis are "forward-looking statements", which reflect management's current beliefs and expectations regarding the Fund and The DATA Group's future growth, results of operations, performance and business prospects and opportunities. Such forward-looking statements, which may be identified by words such as "anticipate", "should", "could", "believe", "continue", "expect", "intend", "may", "will", "project" and "estimate", are based on information currently available to management. Forward-looking statements involve significant risks and uncertainties. Many factors could cause actual results to differ materially from the results discussed in the forward-looking statements, including risks related to competition from competitors supplying similar products and services, failure to develop product and service options, limited growth in the printing of traditional business forms, expansion through acquisition, negotiation of collective agreements, an adverse change in labour relations, pension liabilities, increases in the cost of paper or other raw materials, economic conditions, interest rates and continued availability of credit facilities, among other risk factors. These factors should not be considered exhaustive. Although the forward-looking statements are based upon what management believes to be reasonable assumptions, the Fund and The DATA Group cannot assure investors that actual results will be consistent with these forward-looking statements. Such forward-looking statements are made as of the date of this report. Neither the Fund nor The DATA Group assumes any obligation to update or revise such statements or any information contained in this report, or to publicly release the results of any revisions to forward-looking statements to reflect new events, assumptions or circumstances that the Fund or The DATA Group may become aware of after the date of this report. Undue reliance should not be placed on forward-looking statements.

Non-GAAP Measures

The DATA Group provides some non-GAAP (non-generally accepted accounting principles) measures as supplementary information that management believes would be useful to investors. These non-GAAP measures include Adjusted EBITDA¹ and cash available for distribution². Investors are cautioned that the Fund may calculate these measures differently than other companies or income trusts and, as such, they may not be comparable. These amounts do not have a standardized meaning under GAAP and should not be construed as an alternative to GAAP measures. The Fund has reconciled these non-GAAP measures to the unaudited interim consolidated financial statements and has included them in this management's discussion and analysis, including Adjusted EBITDA¹ to cash available for distribution² (see Table 3), and cash flow from operating activities to cash available for distribution² (see Table 4). See footnotes for further information.

The DATA Group Income Fund

On December 21, 2004, The DATA Group Income Fund completed an initial public offering of 13,327,377 Units at a price of \$10.00 per Unit for aggregate proceeds of \$133.274 million. The Fund also issued 47,823 Units to certain executives for proceeds of \$0.478 million. The proceeds were used to purchase the common shares of Data Business Forms Limited from WFIH, Inc. The total purchase price for the Company was \$129.92 million comprised of cash of \$101.16 million, a note payable of \$14.39 million, the over-allotment note of \$13.97 million, and the right to receive a tax refund estimated to be \$0.4 million.

On January 17, 2005, the underwriters exercised their over-allotment option and the Fund issued an additional 1,486,133 Units for net proceeds of \$13.97 million. The proceeds from the issuance of these additional Units were used to repay the over-allotment note owing to WFIH, Inc. No additional Units have been issued since this date and, as a result, there remains a total of 14,861,333 Units issued and outstanding.

Concurrent with the acquisition of the Company by the Fund, Data Business Forms Limited reorganized, which included an amalgamation with a wholly owned subsidiary of the Fund. As a result of these transactions, the Fund holds a \$117.1 million 14% unsecured, subordinated note (the "DATA Note") due 2014 (subject to extension), payable by the Company to the Fund.

General Information and Results of Operations

On a non-consolidated basis, the Fund generates its income primarily from the interest received on the DATA Note, plus dividends, if applicable. When the expenses it incurs related to the administration of the Fund are taken into account, the Fund generates net income that is distributed to unitholders. For the three months ended September 30, 2005, the Fund generated, on a consolidated basis, cash available for distribution² of \$4.5 million or \$0.302 per Unit.

Distributions

The following is a summary of the declared distributions, record dates and payment dates:

Record Date	Payment Date	Per Unit	Amount
January 31, 2005	February 15, 2005	\$0.12702	\$1.887 million
February 28, 2005	March 15, 2005	\$0.09375	\$1.393 million
March 31, 2005	April 15, 2005	\$0.09375	\$1.393 million
April 29, 2005	May 13, 2005	\$0.09375	\$1.393 million
May 31, 2005	June 15, 2005	\$0.09375	\$1.393 million
June 30, 2005	July 15, 2005	\$0.09375	\$1.393 million
July 29, 2005	August 15, 2005	\$0.09375	\$1.393 million
August 31, 2005	September 15, 2005	\$0.09656	\$1.435 million
September 30, 2005	October 14, 2005	\$0.09656	\$1.435 million

Whenever there is an excess of cash available for distribution² over actual distributions, this excess is retained primarily in the operating company, Data Business Forms Limited, to allow for seasonal fluctuations in cash from operations, unforeseen additional expenses, and future or unforeseen maintenance capital expenditures.

General Information and Results of Operations

* For comparative purposes, foreign exchange losses on advances to the former parent incurred in the three and nine month periods ended September 30, 2004 of \$969 and \$737, respectively, have been added back to adjusted EBITDA.

As the results disclosed in accordance with GAAP for the Fund and the Company prior to the IPO are materially different in many respects due to the change in the underlying capital structure, it is difficult to compare the 2005 and 2004 financial results of the Fund with those of the Company for the period prior to December 21, 2004. However, The DATA Group management believe that the revenues, cost of revenues, gross profits, selling, general and administrative expenses and

Adjusted EBITDA¹ of the underlying business are comparable and, therefore, have included this information in Tables 1 and 2 above, for purposes of comparison.

The DATA Group Income Fund Results of Operations

The Fund recorded revenues of \$52.4 million for the third quarter ended September 30, 2005, an increase of 4.7% compared with the same period in 2004. For the nine months ended September 30, 2005 the Fund recorded revenues of \$159.0 million, an increase of 2.0% or \$3.1 million compared with the same period in 2004. The increase in the current quarter is due to increased revenue in DATA East and West and Sundog of \$1.5 million and \$1.2 million respectively.

Cost of revenues for the third quarter ended September 30, 2005 increased 4.4% from \$36.2 million in 2004 to \$37.8 million in 2005. This, combined with the above noted increase in revenue, resulted in a gross profit of \$14.7 million in the third quarter, an increase of 5.3% or \$0.7 million compared with the same period in 2004. For the nine months ended September 30, 2005 cost of revenues increased from \$110.8 million in 2004 to \$118.8 million in 2005. This resulted in a gross profit of \$40.2 million which decreased from \$45.1 million in 2004. This decline resulted from a charge of \$5.8 million relating to the inventory fair value allocation. At the date of acquisition, \$6.6 million of the purchase price was allocated to inventory in order to increase the value to estimated fair market value, less cost of selling. This inventory was substantially sold during the first quarter of 2005 and accordingly, the quarter included an additional cost of sales charge relating to the inventory sold. As a percentage of revenue, the gross profit declined in the first nine months of 2005 to 25.3% from 28.6% in 2004. Before the fair value inventory allocation charge, gross profit margins were 28.9% in the first nine months of 2005. Further comments on each reporting segment are discussed below.

Selling, general and administrative expenses, including administrative expenses of the Fund, for the quarter ended September 30, 2005 were \$9.7 million as compared to \$9.5 million for the same period in 2004. The \$0.2 million increase in expenses resulted primarily from \$0.3 million of increased public company costs compared with 2004. Selling, general and administrative expenses were 18.5% of revenue for the quarter ended September 30, 2005 compared to 18.9% in 2004. For the nine months ended September 30, 2005, selling, general and administrative expenses were \$29.9 million as compared to \$29.4 million in 2004. Public company costs for the nine months ended September 30, 2005 were \$1.0 million.

Net income for the quarter ended September 30, 2005 was \$3.2 million compared with net income of \$1.1 million for the same period in 2004. For the nine months ended September 30, 2005, net income was \$6.4 million compared to net income of \$9.0 million for the same period in 2004. The reduction in comparable profitability on a quarter to date and year to date basis is attributable to increased public company costs, amortization of purchase accounting intangible assets and the purchase accounting fair value inventory charge incurred in the first quarter of 2005.

For the quarter ended September 30, 2005, earnings before interest, taxes, depreciation and amortization (Adjusted EBITDA¹) was \$5.7 million, or 10.9% of revenue. As compared to the same period in 2004, Adjusted EBITDA¹, before the impact of foreign exchange losses on advances to the former parent, was higher by \$0.2 million. For the nine months ended September 30, 2005, Adjusted EBITDA¹ was \$18.6 million, or 11.7% of revenue. As compared to the same period in 2004, Adjusted EBITDA¹, before the impact of foreign exchange losses on advances to the former parent, was lower by \$0.2 million and the Adjusted EBITDA¹ margin, before the impact of foreign exchange losses on advances to the former parent, as a percentage of revenue, decreased slightly from 12.0% of revenue to 11.7% of revenue.

When the Fund purchased the Company, \$56.6 million of the purchase price was allocated to intangible assets, which represents the value of customer relationships, trademarks and trade names and the value of technology and software acquired. Intangible assets are amortized over the expected periods of benefit, generally from seven to nine years, which resulted in a charge of \$1.7 million for the quarter ended September 30, 2005 and \$5.2 million for the year to date period in 2005. In accordance with GAAP, goodwill represents the excess of the purchase price over the fair value of tangible and intangible assets acquired, and is not amortized. No impairment provision against goodwill was required during the three months and nine months ended September 30, 2005.

Interest expense on long-term debt relating to the bank term debt was \$0.5 million for the quarter ended September 30, 2005 and \$1.6 million year to date in 2005. This represented an effective 4.75% interest rate on the Company's \$40.0 million term bank loan. Non-cash interest expense totaling \$0.1 million for the quarter ended September 30, 2005 and \$0.2 million for the year to date period in 2005 is comprised of the amortization of deferred finance fees included in interest on long-term debt.

Interest income of \$0.05 million was earned during the quarter ended September 30, 2005 and \$0.1 million in the year to date period in 2005. This interest relates to the cash and cash equivalents held by the Fund.

The Fund reported pre-tax income of \$2.8 million and a recovery of future income taxes of \$0.4 million for the quarter ended September 30, 2005. For the year to date period ended September 30, 2005 the Fund reported pre-tax income of \$3.3 million and a recovery of future income taxes of \$2.6 million. The recovery of future income taxes arises primarily from accounting charges in excess of deductions claimed for tax purposes including the amortization of intangibles (\$1.7 million for the quarter ended September 30, 2005 and \$5.2 million for the year to date period ended September 30, 2005) and purchase adjustments relating to inventory, which are included in the cost of goods sold (\$6.6 million for the period ended September 30, 2005).

Generally, the expected income tax expense would be \$1.0 million based on statutory income tax rates of 34%, while the actual income tax recovery is \$0.4 million for the quarter ended September 30, 2005. Since the Fund is a mutual fund trust for Canadian income tax purposes, the income that is allocated to the unitholders is not taxable in the Trust. As a result, interest paid by the Company to the Trust is not taxable in the Fund. During the quarter ended September 30, 2005, the Company paid the Trust interest in the amount of \$4.1 million, which increases the total tax recoverable by \$1.4 million.

DATA East and West

Revenues for the quarter ended September 30, 2005 increased 3.7% to \$41.3 million from \$39.8 million in 2004. For the nine months ended September 30, 2005, revenue also increased to \$123.2 million from \$121.4 million in the prior year.

The revenue increase in the quarter was due to the continued focus on higher value added Document Management Services (DMS) contracts and agreements. The business continues to experience growth in DMS revenue, variable imaging, labels and lottery slips. Year to date, the growth in the higher value added products and services has more than offset the decline in the very low value added stock tab segment.

Cost of revenues increased in the quarter from \$28.5 million in 2004 to \$29.5 million for the quarter ended September 30, 2005. The increase in cost of revenues of 3.5% was in line with the increase

in revenues. For the quarter ending September 30, 2005 gross profit increased to \$11.8 million from \$11.3 million or 4.1% over the prior year. After adjusting for the inventory fair value allocation charge, cost of revenues on a year to date basis increased 1.4% from \$85.6 million in 2004 to \$86.8 million in 2005. As a result, gross profit remained consistent at 29.5% in 2005 year to date compared to 29.4% in 2004.

Sundog

Revenues for the quarter ended September 30, 2005 increased 23.5% to \$6.1 million from \$4.9 million in the same period in 2004. For the nine months ended September 30, 2005, revenue increased 8.0% to \$19.6 million from \$18.2 million in 2004.

The increase in revenue is due to a number of factors including completion of two major specialty book projects, production of programs for a major western exhibition, and various projects for a major Alberta based homebuilder. Demand in the Alberta marketplace continues to be strong and has been a significant contributor to revenue growth in this segment.

Cost of revenues increased 24.2% in the quarter from \$3.3 million in 2004 to \$4.1 million in 2005. The increase is in line with the revenue increases outlined above. For the nine months ended September 30, 2005, cost of revenues have increased 4.9% from \$12.3 million in 2004 to \$12.9 million. Gross profit has increased from \$1.6 million to \$2.0 million for the quarter ended September 30, 2005 and increased from \$5.9 million to \$6.7 million for the nine months ended September 30, 2005.

Multiple•Pakfold

Results at Multiple were disappointing as revenue for the quarter ended September 30, 2005 decreased by 2.6% to \$6.4 million from \$6.6 million. For the nine months ended September 30, 2005, revenue decreased 2.4% to \$19.4 million from \$19.8 million in 2004.

The decrease in revenue in the quarter was due to the loss of a significant order from a third party produced in the same quarter of the prior year. This loss has been partially offset by new sales initiatives.

Cost of revenues for the quarter ended September 30, 2005 decreased by 1.8% to \$5.4 million from \$5.5 million in 2004. Therefore, gross profit in the quarter decreased by 6.6%. For the nine months

ended September 30, 2005, cost of revenues remained consistent at \$16.3 million which has resulted in year to date gross profit decline of 13.2% or \$0.5 million.

New management installed earlier in the year has started to make significant strides in reducing costs and improving operating efficiencies. These gains, in part, will materialize in early 2006.

Management have achieved significant improvements in one of two plants. Their challenge now is to achieve the same improvements in the other plant while replacing the aforementioned revenue loss in that location.

Payments to The DATA Group Income Fund

The Fund generated \$4.5 million or \$0.302 per Unit of cash available for distribution² for the period July 1, 2005 to September 30, 2005. Cash available for distribution² for the period has been calculated by adding the loss on disposal of fixed assets of \$0.2 million, deducting cash interest of \$0.4 million, maintenance capital expenditures of \$0.7 million, and cash pension contribution of \$0.3 million from Adjusted EBITDA¹ of \$5.7 million. For the period December 21, 2004 to September 30, 2005, the Fund generated \$16.0 million or \$1.078 per unit of cash available for distribution². Cash available for distribution² was calculated by adding the loss on disposal of fixed assets of \$0.2 million, deducting cash interest of \$1.3 million, maintenance capital expenditures of \$1.2 million, and cash pension contribution of \$0.9 million from Adjusted EBITDA¹ of \$19.2 million. See Table 3 for a breakdown of these figures for the period from December 21, 2004 to September 30, 2005.

Cash payments to the Fund were sufficient to declare distributions of \$4.3 million or \$0.287 per Unit for the period July 1, 2005 to September 30, 2005. The calculation of cash available for distribution² exceeded actual distributions by \$0.2 million or \$0.015 per Unit for the period July 1, 2005 to September 30, 2005. For the period December 21, 2004 to September 30, 2005 the Fund declared distributions of \$13.1 million or \$0.8826 per Unit. The calculation of cash available for distribution² exceeded actual distributions by \$2.9 million or \$0.195 for the period December 21, 2004 to September 30, 2005.

Table 3

Cash Available for Distribution² and Adjusted EBITDA¹
For the periods ended September 30, 2005
(in thousands of dollars, except per unit amounts, unaudited)

Period ended	July 1 to September 30, 2005 \$	Dec. 21, 2004 to September 30, 2005 \$
Net Income	3,204	5,885

** Special contributions funded out of proceeds from the IPO

Liquidity and Capital Resources

Concurrent with the acquisition of the Company, the existing credit facilities with outstanding borrowings of \$53.9 million were repaid and a new credit facility was obtained. The Company entered into a three-year revolving credit bank facility having a total availability of \$50.0 million. The new credit facility is secured by substantially all of the Company's assets and bears interest at prime plus varying rates between 0% and 2%, dependent upon achieving certain financial ratios. At September 30, 2005, there was \$40.0 million of borrowings outstanding. The revolving term facility is available to finance working capital fluctuations and capital expenditures.

Subsequent to the quarter, the Company entered into an interest rate swap to fix the interest rate on \$30.0 million of its outstanding debt for a period of 26 months. The effective interest rate on the debt

subject to the interest rate swap is 5.66%. The interest rate swap will be accounted for as a cash flow hedge. As a cash flow hedge, interest expense will be recognized at the fixed rate of 5.66%.

Cash Flow from Operations

As cash flow from operations has been determined in accordance with Canadian GAAP, management believes that the reconciliation of this measure to cash available for distribution² provides useful supplemental information for investors, as illustrated in Table 4 above.

Changes in non-cash working capital have reduced cash by \$1.8 million in the quarter ending September 30, 2005. Accounts receivable have increased by \$0.9 million which is consistent with the revenue increases in the DATA East and West and Sundog segments. Accounts payable and accrued liabilities have been reduced by \$1.3 million. Of this reduction \$0.8 million is due to settlement of closing costs with WFIH, Inc. the former owner. The remaining reduction in accounts payable and accrued liabilities is due to a \$1.2 million timing difference in wage and vacation accruals offset by a \$0.5 million increase in DATA East and West segment payables consistent with the above noted revenue increase.

Investing Activities

The Fund acquired Data Business Forms Limited on December 21, 2004 for a total cash payment of \$101.16 million and the issuance of a note in the amount of \$14.388 million, a convertible note in the amount of \$13.97 million, and the obligation to pay the former owners of Data Business Forms Limited a tax refund amount estimated to be \$0.4 million. The total cash paid was increased by \$13.97 million on January 17, 2005 when the over-allotment note was paid. The total cash paid for the purchase was \$115.1 million. Upon acquisition, the Company held cash balances of \$0.3 million and, accordingly, the total cash investment was \$114.8 million. Capital expenditures in the quarter of \$0.722 million and year to date of \$1.2 million related primarily to maintenance capital expenditures financed by operating cash flows.

Financing Activities

On December 21, 2004, the Fund completed an initial public offering of 13,327,377 Units for net proceeds of \$123.071 million, after expenses of \$10.203 million. The Fund also issued 47,823 Units to certain executives for proceeds of \$0.478 million. On January 17, 2005, the underwriters exercised their over-allotment option, and the Fund issued an additional 1,486,133 Units for net proceeds of \$13.970 million. The total net cash proceeds from the issuance of Units totalled \$137.5 million.

Upon acquisition, \$53.9 million of existing long-term borrowings of Data Business Forms Limited were repaid and a new credit facility was obtained. The initial proceeds obtained under the new credit facility were \$40.0 million. The costs associated with the new credit facility were \$0.9 million and are reported as deferred finance fees on the balance sheet less accumulated amortization.

Financial Instruments

The DATA Group Income Fund's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, unitholder distributions payable and long-term debt, the amounts of which are included in the Fund's balance sheet as at September 30, 2005 and December 31, 2004.

The carrying value of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities and unitholder distributions payable approximates their fair value due to the immediate or short-term maturity of these financial instruments. The fair value of the long-term debt approximates its carrying value as it bears interest at a floating interest rate.

The DATA Group is exposed to credit risk with respect to its accounts receivable. However, this is minimized by The DATA Group's large client base and by careful control and follow-up of customers' accounts. Creditworthiness of customers is monitored continuously. The DATA Group maintains an allowance for bad debts and credit losses, which to date have been within expectations. The DATA Group is also exposed to credit risk with its holdings of cash and cash equivalents. The DATA Group minimizes this credit risk by placing these financial assets with governments and well-capitalized financial institutions.

Contractual Obligations

The DATA Group believes that it will have sufficient resources from its operating cash flow to meet its contractual obligations as they become due. Contractual obligations have been defined as contractual commitments in existence but not paid for as at September 30, 2005. For further clarity, short-term commitments such as month-to-month office leases, which are easily cancelled, are excluded from this definition. Operating leases include payments to landlords for the rental of facilities and equipment. During the quarter, the Company entered into an operating lease for computer hardware and support service that will increase commitments by approximately \$0.7 million

per year for three to five years. Please refer to the December 31, 2004 Balance Sheet for detail of the contractual obligations as at December 31, 2004.

The Company has a defined benefit pension plan for the benefit of certain employees and a defined contribution plan for other employees. During the period ended September 30, 2005, the Company contributed \$6.9 million to the defined benefit plan. Management expects that payments under the defined benefit pension plan will be approximately \$2.4 million in calendar 2005 and payments for the defined contribution plan should continue in 2005 at approximately the same level as in 2004.

Off-Balance Sheet Arrangements

The Fund has no off-balance sheet arrangements other than operating leases and pension obligations as described elsewhere in the MD&A. As described previously, subsequent to September 30, 2005, the Fund's subsidiary entered into an interest rate swap to hedge the interest rate on \$30.0 million of long-term debt.

Transactions with Related Parties

There are regular intercompany activities between the Fund and its subsidiaries during the normal course of business. These transactions and balances are eliminated in the consolidated financial statements of the Fund. Related parties are defined as individuals who can influence the direction or management of the Fund or any of its subsidiaries and are, therefore, the trustees of the Fund or the directors and officers of the Fund's subsidiaries. Neither the Fund nor any of its subsidiaries entered into any transactions with related parties as defined above during the period ended September 30, 2005.

Critical Accounting Estimates

Details of the critical accounting estimates are available in the first quarter management's discussion and analysis for the period ended March 31, 2005.

New Accounting Policies

As noted above the Company has undertaken a transaction to hedge its interest rate risk on \$30 million of the new floating rate credit facility. The Company will apply the accounting requirements of the CICA's Accounting Guideline 13, "Hedging Relationships". This standard sets out the conditions that must be met in order to apply hedge accounting. Any derivative financial instrument that does

not qualify for hedge accounting must be accounted for on a mark-to-market basis. The impact of not applying hedge accounting is that gains and losses on a derivative instrument may not be recorded in the same accounting period as gains or losses on the hedged item.

Taxation

The Fund qualifies as a mutual fund trust as defined under the Income Tax Act (Canada) (the “Tax Act”) and is subject to taxation on its income for the year, less the portion paid or payable in respect of distributions to unitholders. Since it is the intention to pay all of the net income of the Fund to unitholders, the Fund itself should have no taxable income and, therefore, should not pay any income tax, which was the case for the 2004 fiscal year.

From the unitholders’ perspective, amounts paid or payable by the Fund in respect of the distribution period of the fiscal year are taxable in the hands of the unitholders as interest and dividend income, as the case may be. In certain circumstances, distributions are classified as a return of capital for Canadian income tax purposes, rather than as interest or dividend income. Unitholders who are non-residents of Canada are required to pay all withholding taxes payable in respect of any distributions by the Fund.

Liquidity and Capital Resources

The Fund’s operating cash flows are generated entirely from interest on the Company Notes and dividends. Regular monthly distributions are paid to unitholders based on the cash received less expenses of the Fund and any amounts paid in connection with the redemption of Units. On an ongoing basis, the Fund does not expect to require additional capital resources to maintain its investment in the Company, other than the renegotiation of credit arrangements from time to time or in connection with financing for acquisition purposes.

Risks and Uncertainties

Among the risks and uncertainties affecting the Fund are the following (see also the Fund’s final prospectus dated December 14, 2004):

Currency Risk

The Company is exposed to some minor financial risk from fluctuations in exchange rates and the degree of volatility in these rates.

Interest Rate Risk

Advances under the New Credit Facility will bear interest at rates based upon the prime rate of interest. Accordingly, the Company will be exposed to interest rate risk on those advances. The Company may undertake transactions to hedge its interest rate risk on the New Credit Facility.

Commodity Prices

Due to the significance of paper in the manufacture of most of the Company's products, The DATA Group is dependent upon the availability of competitively priced paper. In fiscal 2004, the cost of paper represented approximately 25.4% of the Company's cost of revenues. Historically and consistent with industry practice, the Company has generally been able to pass on price increases in the cost of paper to its customers. The Company cannot be certain that it will be able to pass on future increases in the cost of paper to its customers.

See also "Risk Factors" for a discussion of other risks and uncertainties affecting the Company's business.

Dependence on the Company

The Fund is a trust, which is entirely dependent on the operations and assets of the Company through the ownership of shares and the Company Notes. Accordingly, the cash distributions per Unit to the holders thereof are dependent on the Company's ability to pay its interest obligations under the Data Note and to declare and pay dividends or make other distributions on its shares, which will depend, among other things, on compliance with applicable laws and its credit facilities.

Cash Distributions Are Not Guaranteed and Will Fluctuate with the Company Performance

Although the Fund intends to distribute the interest and dividend income earned by the Fund, less expenses and any amounts paid by the Fund in connection with the redemption of Units, there can be no assurance regarding the amounts of income to be generated by the Company and paid to the Fund. The actual amount distributed in respect of the Units will depend upon numerous factors, including profitability, debt covenants, intercompany guarantees by the Fund, fluctuations in working capital, the sustainability of margins and capital expenditures.

Restrictions on Potential Growth

The Company will pay out substantially all of its operating cash flow. This will make any additional capital and operating expenditures and further acquisitions dependent on increased cash flow or additional financing in the future. Lack of such funds could limit the future growth of the Company and its cash flow.

Income Tax Matters

There can be no assurance that Canadian federal income tax laws governing the treatment of mutual fund trusts will not be changed in a manner that could adversely affect the holders of Units. If the Fund ceases to qualify as a “mutual fund trust” under the Tax Act, the income tax considerations would be materially different.

Income fund structures generally involve significant amounts of intercompany or similar debt, generating substantial interest expense, which serves to reduce earnings and, therefore, income tax payable. There can be no assurance that taxation authorities will not seek to challenge the amount of interest expense deducted. The Company’s management believes that the interest expense inherent in the structure of the Fund is supportable and reasonable.

In addition, the federal Department of Finance has launched public consultations and recently published a paper on tax and other issues related to publicly listed flow-through entities (“FTEs”), including income funds. A primary focus of the consultation paper is to assess whether the income tax system in Canada should be modified. While not an exhaustive list of possible policy initiatives, the consultation paper identified three possible policy responses to issues relating to FTEs: (i) limiting deductibility of interest expense by operating entities; (ii) taxing FTEs in a manner similar to corporations; or (iii) making the tax system more neutral with respect to all forms of business organization by better integrating the personal and corporate tax system. In addition, the Canada Revenue Agency has imposed a moratorium on granting any income tax rulings with respect to income funds and other flow-through entities, pending the completion of its review. It cannot be determined at this time whether there will be changes to the Canadian tax system or, if there are changes, how such changes will affect Data Business Forms Limited, The DATA Group Income Fund, or particular unitholders of The DATA Group Income Fund.

The Company may be reassessed for taxes from time to time. Such reassessments, together with associated interest and penalties, could adversely affect the Company and the Fund.

Outlook

Management believes that the Fund will continue to meet its objectives for the balance of the year, continuing, at minimum, to meet its monthly per unit distributions to unitholders of \$0.09656.

The Company will continue to fund necessary maintenance capital expenditures by utilizing cash flow from operations. Based on year to date and what is anticipated for the rest of the year, maintenance capital expenditures are expected to be considerably less than the conservative \$3.7 million forecast in the prospectus.

The Company will continue its strategic focus on being the leading document management service provider in Canada, concentrating on providing high value added products and services to achieve target annual organic profit growth of 2.5% to 3%. The Company will also pursue acquisition opportunities, which are accretive to distributable cash before synergies.

- 1. While Adjusted EBITDA (earnings before interest, taxes, depreciation and amortization adjusted for the non-cash inventory charges) is not a recognized measure under Canadian generally accepted accounting principles (GAAP), management believes it to be a useful supplemental measure. Investors are cautioned that EBITDA and Adjusted EBITDA should not be construed as an alternative to net income (loss) as an indicator of The DATA Group's performance or cash flows. The DATA Group's method of calculating EBITDA and Adjusted EBITDA may differ from other companies' or income trusts' and may not be comparable to measures used by other companies or income trusts. For a reconciliation of net income to Adjusted EBITDA, see Table 3.*
- 2. Cash available for distribution, or distributable cash, is not intended to be representative of cash flow or results of operations determined in accordance with GAAP and does not have a standardized meaning prescribed by GAAP. Cash available for distribution is unlikely to be comparable to similar measures used by other companies or income trusts. The calculation of cash available for distribution is different from actual cash flow. For a reconciliation of cash flow from operations to cash available for distribution, see Table 4. If the calculation of cash available for distribution had included pension contributions, the Fund's cash available for distribution would have been decreased by approximately \$5 million or \$.336 per Unit for the period from December 21, 2004 to September 30, 2005.*

1 The Fund

The Data Group Income Fund (the “Fund”) is a trust established under the Laws of the province of Ontario pursuant to a Declaration of Trust dated November 15, 2004. The Fund was created to invest in common shares and \$117,140 of 14% unsecured subordinated notes of Data Business Forms Limited (the “company” or “Data Business Forms”).

On December 14, 2004, the Fund filed a final prospectus for the sale of 13,327,377 units at the price of \$10.00 per unit, for aggregate gross proceeds of \$133,274. The cost related to the issuance of the units was \$10,203, resulting in net proceeds of \$123,071. The Fund also issued 47,823 units to certain executives for proceeds of \$478. On December 21, 2004, in conjunction with the closing of the public offering, the Fund acquired all the outstanding shares of Data Business Forms. Concurrent with the acquisition, Data Business Forms reorganized, which included the statutory amalgamation with a subsidiary of the Fund. The amalgamated company continued as Data Business Forms Limited.

The acquisition has been accounted for by the purchase method from the date of acquisition. The allocation of the purchase price is not finalized due to estimates used in determining the fair value of the assets acquired and liabilities assumed. The preliminary purchase price allocation is as follows:

	\$
Cash and cash equivalents	323
Accounts receivable	25,420
Inventories	29,122
Prepaid expenses and other assets	2,000
Income taxes recoverable	671
Property and equipment	16,119
Due from parent	14,388
Goodwill	88,194
Intangible assets	56,600
Accounts payable and accrued liabilities	(19,852)
Pension obligation	(10,724)
Long-term debt	(53,913)
Future income tax liabilities - net	(18,430)
	<u>129,918</u>
Consideration	
Cash	101,160
Convertible note (over-allotment note)	13,970
Note payable	14,388
Accrued consideration payable	400
	<u>129,918</u>

Notes to Interim Consolidated Financial statements
(Unaudited)
September 30, 2005

(in thousands of dollars, except per unit amounts)

Immediately following the acquisition, the note payable of \$14,388 was settled by offsetting this note with the amount due from parent of \$14,388. On January 17, 2005, the Fund repaid the \$13,970 convertible note with proceeds from the issuance of an additional 1,486,133 units.

Data Business Forms offers a wide variety of print and electronic products and related services, which include traditional business forms, labels, direct mail products, security documents, commercial print and facility and print management. The company operates in the following business segments:

- i) Data East and West - sells a broad range of printed products and document management services directly to customers in the Canadian market;
- ii) Multiple•Pakfold® - sells forms and labels to independent brokers/resellers in the Canadian market; and
- iii) Sundog - commercial printing division and total document management and event ticket production.

2 Summary of significant accounting policies

Basis of presentation

These unaudited interim consolidated financial statements as at September 30, 2005 and for the period from December 21, 2004 to September 30, 2005 have been prepared by management in accordance with Canadian generally accepted accounting principles for interim financial statements and include all adjustments, consisting of normal and recurring items, that management considers necessary for a fair presentation of the financial position, results of operations and cash flows. Results for the period ended September 30, 2005 are not necessarily indicative of results expected for the full fiscal year or any other future period.

The disclosures provided in these interim consolidated financial statements do not conform in all respects to the requirements of Canadian generally accepted accounting principles for annual financial statements and, accordingly, the interim consolidated financial information should be read in conjunction with the annual financial statements for the year ended April 30, 2004 included in the Data Group Income Fund prospectus dated December 14, 2004 and the consolidated balance sheet as at December 31, 2004. The interim consolidated financial statements have been prepared using the same accounting policies as applied to the fund's annual financial statements.

These interim consolidated financial statements reflect the results of operations for the period from December 21, 2004 to September 30, 2005. As the Fund commenced operations on December 21, 2004, no comparative information is provided.

Principles of consolidation

The consolidated balance sheet includes the accounts of the Fund and its wholly owned subsidiary company. All intercompany transactions have been eliminated.

Notes to Interim Consolidated Financial statements
(Unaudited)
September 30, 2005

(in thousands of dollars, except per unit amounts)

Revenue recognition

Revenue from the sale of product is recognized upon shipment to the customer, when the transfer of title and when risk of loss passes to the buyer. Revenue from services is recognized upon completion of services provided to the customer. The majority of products are customized and product returns are not significant. Warehousing fees are recognized as the service is provided.

Concentration of credit risk

Financial instruments, which potentially subject the Fund to concentrations of credit risk, consist primarily of trade accounts receivable.

Credit risk with respect to trade receivables, in management's opinion, is limited due to industry and geographic diversification. The four largest customers represent 10% of total accounts receivable. An allowance for doubtful accounts is maintained to cover estimated credit losses.

Inventories

Raw materials inventories are stated at the lower of cost and replacement cost. Printed finished goods and work-in-progress are recorded at the lower of cost and net realizable value. Cost of finished goods and work-in-process at December 21, 2004 was determined based on estimated fair value and subsequent thereto using the first-in, first-out method. Inventory manufactured by the company includes the cost of materials and labour and the applicable share of variable production overhead.

Cash and cash equivalents

Cash and cash equivalents consist of cash on deposit and highly liquid short-term interest bearing securities with maturities of three months or less at the date of purchase.

Property and equipment

Property and equipment are recorded at cost. Additions and improvements are capitalized. Maintenance and repairs are expensed as incurred. Depreciation is computed using the methods and rates based on the estimated useful lives of the property and equipment as outlined below:

	Basis	Rate
Leasehold improvements	straight-line	lease term
Office furniture and equipment	diminishing balance	20%
Presses and printing equipment	straight-line	1 to 10 years
Computer hardware and software	straight-line	1 to 5 years

Notes to Interim Consolidated Financial statements
(Unaudited)
September 30, 2005

(in thousands of dollars, except per unit amounts)

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. An estimate of undiscounted future cash flows produced by the assets, or the appropriate grouping of assets, is compared with the carrying value to determine whether an impairment exists. If an impairment is determined to exist, the assets are written down to fair value.

Intangible assets

Intangible assets are related to acquisitions and are recorded at their fair value at the acquisition date. These assets include customer relationships, existing technology, trademarks and trade names. These assets are amortized over their estimated useful lives of seven to nine years.

Management reviews the carrying value of its intangible assets annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired. If an impairment is determined to exist, the assets are written down to fair value.

Goodwill

Goodwill represents the excess of cost over the fair value of tangible and identifiable intangible assets acquired in business combinations accounted for by the purchase method.

Goodwill is not amortized but is subject to an annual impairment review or more frequently if circumstances indicate goodwill may be impaired. An impairment is recognized when the fair value of a reporting unit is less than the carrying value of the reporting unit's net assets. These impairment reviews are highly dependent on management's projection of future results for this reporting unit, and there can be no assurance that at the time such reviews are completed, a material impairment charge will not be recorded.

Pensions

The cost of pensions and other retirement benefits earned by employees covered by the defined benefit pension plans is determined using the projected benefit method pro-rated on service and management's best estimate of expected plan investment performance, salary escalation and retirement ages of employees. The discount rate used to determine the accrued benefit obligation is determined by reference to market interest rates. For the purpose of calculating the expected return on plan assets, those assets are valued at fair market value. Adjustments arising from changes in pension benefits and assumptions and experience gains and losses above 10% of lower of the accrued benefit obligation and plan assets are amortized over the expected average remaining service lives of the employees.

Deferred finance fees

Finance costs related to the acquisition of financing are deferred and amortized as interest expense over the term of the related debt.

Notes to Interim Consolidated Financial statements
(Unaudited)
September 30, 2005

(in thousands of dollars, except per unit amounts)

Leases

Leases are classified as capital or operating depending on the terms and conditions of the contracts. Where the Fund is the lessee, asset values recorded under capital leases are amortized on a straight-line basis over the term of the lease. Obligations recorded under capital leases are reduced by lease payments net of imputed interest.

Income taxes

The Fund is a mutual fund trust for income tax purposes and, therefore, is not subject to tax on income distributed to unitholders. Taxes payable on income of the Fund's distribution to unitholders are the responsibility of individual unitholders.

Income taxes for the Fund's subsidiaries are calculated using the liability method of accounting for income taxes. Future income tax assets or liabilities are recognized for temporary differences arising from assets and liabilities whose bases are different for financial reporting and income tax purposes. Future taxes are measured using the substantially enacted tax rates and laws that will be in effect when the differences are expected to reverse. The income tax expense or benefit is the income tax payable or refundable for the year plus or minus the change in future income tax assets and liabilities during the year.

Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at rates of exchange in effect at the balance sheet date. Revenues and expenses are translated at rates prevailing on the transaction dates. Gains and losses resulting from translation are included in net earnings for the year.

Financial instruments

The carrying value of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, the convertible note and note payable approximates fair value due to the short-term maturities of these instruments. The fair value of the term bank loan is not significantly different from its carrying values as the loan bears interest at floating interest rates.

Income (loss) per unit

Income (loss) per Fund unit is computed by dividing the net income (loss) available for Fund unitholders by the weighted average number of Fund units outstanding during the period.

Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and the disclosure of the contingent assets and liabilities at the date of the financial statements and revenue and expenses for the period reported. Actual results could differ from those estimates.

3 Inventories

	September 30, 2005	December 31, 2004
	\$	\$
	(Unaudited)	
Paper, carbon and ink	5,742	6,759
Work-in-progress	2,226	2,398
Forms, computer paper and labels	13,661	18,809
	<hr/>	
	21,629	27,966
	<hr/>	

At the date of acquisition, the cost of inventory was increased by \$6,668 representing the excess of the estimated fair value of inventory over the cost of inventory in the acquired company, Data Business Forms.

4 Intangible assets

Intangible assets comprise:

	September 30, 2005		
	(Unaudited)		
	Cost	Accumulated amortization	Net
	\$	\$	\$
Software and technology	10,000	1,114	8,886
Customer relationships	38,900	3,370	35,530
Trademarks and trade names	7,700	667	7,033

5 Income taxes

The difference between the income tax recovery and the recovery sustained for the period from December 21, 2004 to September 30, 2005 by applying the statutory rate is as follows:

	For the three months ended September 30, 2005	For the period from December 21, 2004 to September 30, 2005
	\$	\$
	(Unaudited)	(Unaudited)
Expected income tax at 34%	962	1,107
Trust income not taxable	(1,401)	(4,175)
Other items - net	64	438
	<hr/>	<hr/>
Income tax recovery	(375)	(2,630)

The composition of the future income tax asset and liability is as follows:

	September 30, 2005	December 31, 2004
	\$	\$
	(Unaudited)	
Inventory	-	1,953
Property and equipment	1,253	1,408
Intangible assets	17,418	19,110
Pension obligation	(1,636)	(1,929)
Deferred finance fees	(652)	(759)
Benefit of income tax loss carry-forwards	(578)	(1,526)
Other	(5)	(21)
	<hr/>	<hr/>
Net future tax liability	15,800	18,236
Current future tax liability	-	1,931
	<hr/>	<hr/>
Long-term future tax liability	15,800	16,305

6 Term bank loan

	September 30, 2005	December 31, 2004
	\$	\$
	(Unaudited)	
Revolving term bank loan	40,000	40,000

On December 21, 2004, the company entered into a three-year revolving credit bank facility in the amount of \$50,000. The facility is secured by substantially all of the company's assets and bears interest at prime plus varying rates between 0% to 2%, dependent upon certain financial ratios. As at September 30, 2005, the effective interest rate was 4.75% (December 31, 2004 - 4.5%). The provisions under this facility provide for restrictions on the operations and activities of the company. Generally, the most significant restrictions relate to permitted investments and distributions, as well as the incurrence and maintenance of certain financial ratios primarily linked to total debt to net income before interest, income taxes, depreciation and amortization and non-cash employee compensation. As at September 30, 2005, the company was in compliance with all covenants. The revolving term facility is repayable in full in December 2007.

7 Convertible note

The consideration for the acquisition of Data Business Forms included a \$13,970 convertible note (the "over-allotment note"). Pursuant to the terms of the note, in the event that the over-allotment option to acquire up to 1,486,133 units was exercised by the underwriters, the note would be repaid in cash. Otherwise, the note was required to be converted into 1,486,133 units within 30 days of closing of the public offering. On January 17, 2005, 1,486,133 units were issued for net proceeds of \$13,970 on exercise of the over-allotment option, and the note was repaid in cash.

8 Pension obligation

The Fund maintains a defined benefit and a defined contribution pension plan for certain employees and contributes to the Graphics and Communications International Union pension plan for certain employees at the Granby plant. There are no other post-retirement benefits for employees. The most recent actuarial valuation for these plans was completed on January 1, 2004.

Information about the Fund's defined benefit pension plan as at September 30, 2005 and December 31, 2004, in aggregate, is as follows:

9 Unitholders' equity

An unlimited number of units may be issued pursuant to the declaration of trust. Units are redeemable by the holder at a price equal to the lesser of 90% of the market price of a unit during the 10 consecutive trading day period ending on the trading day immediately prior to the date on which the units were surrendered for redemption and an amount based on the closing price on the redemption date, subject to certain restrictions. Each holder of units of the Fund participates pro rata in any distributions from the Fund. Income tax obligations related to the distributions by the Fund are obligations of the unitholders. Each unit is entitled to one vote at any meeting of unitholders. The Fund issued one unit on November 15, 2004 for cash proceeds of ten dollars. Upon completion of the initial public offering, the initial unit was redeemed for ten dollars.

On December 14, 2004, the Fund issued 13,327,377 units for cash proceeds of \$123,071, net of unit issuance costs of \$10,203. The Fund also issued 47,823 units to certain executives for \$478. On January 17, 2005, the Fund issued 1,486,133 units for net cash proceeds of \$13,970.

The following summarizes the movement in units:

	Number of units	Amount \$
Issued pursuant to declaration of trust	1	-
Redeemed	(1)	-
Issued upon initial public offering	13,327,377	123,071
Issued to certain executives	47,823	478
	<hr/>	<hr/>
Balance - December 31, 2004	13,375,200	123,549
Issued upon exercise of the over-allotment option	1,486,133	13,970
	<hr/>	<hr/>
Balance – September 30, 2005	14,861,333	137,519

10 Distributions

The Fund makes regular monthly distributions to unitholders of record as of the last business day of each month. Distributions to unitholders are calculated and recorded when declared. Distributions for the six-month period ended September 30, 2005 are as follows:

Period	Record date	Payment date	Per unit \$	Amount \$
January 2005	January 31, 2005	February 15, 2005	0.127	1,888
February 2005	February 28, 2005	March 15, 2005	0.094	1,393
March 2005	March 31, 2005	April 15, 2005	0.094	1,393
April 2005	April 29, 2005	May 13, 2005	0.094	1,393
May 2005	May 31, 2005	June 15, 2005	0.094	1,393
June 2005	June 30, 2005	July 15, 2005	0.094	1,393
July 2005	July 29, 2005	August 15, 2005	0.094	1,393

	(1,783)	6,883

11 Segmented information

The company has three reportable segments organized on the basis of geography, channels and specialties as follows: Data East and West; Multiple Pakfold; and Sundog. These segments follow the same accounting policies as described in the summary of significant accounting policies, and all intersegment revenues are recorded at the exchange amount. Management evaluates the performance of each segment based on earnings before interest and taxes (EBIT). Corporate

Notes to Interim Consolidated Financial statements

12 Subsequent Event

Subsequent to September 30, 2005, the Fund's subsidiary entered into an interest rate swap to fix the interest rate on \$30 million of its term bank loan for a period of 26 months. The effective interest rate on the loan subject to the interest rate swap is 5.66%. The interest rate swap will be accounted for as a cash flow hedge and follow synthetic instrument accounting. Under this method, interest expense is recognized as if the hedge and the hedged item were a single instrument.
